### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 103***

Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galler, U.S. Patent 3,196,018, in view of Armand Products Company brochure, for the reasons set forth in the previous Office Action.

### ***Response to Arguments***

Applicant's arguments filed September 29, 2005, have been fully considered but they are not persuasive.

Applicant argues that Galler does not disclose a coating that is only hydrogenated fat. Applicant points to Example IX as evidence of this assertion. The Examiner at no point relied on this specific example and respectfully disagrees with Applicant's assertion. Galler discloses the coating being tallow (column 3, line 32). While Galler goes on to disclose the inclusion of a digestible material (column 3, lines 36-60) and combinations of film materials (like in Example IX), these are only specific embodiments and thus, these ingredients are not required. Further evidence that Galler does disclose a coating that is only tallow can be inferred from the process taught at column 3, lines 68-71, which states, "the product may be prepared by dispersing MBA in

a molten or viscous mass of the coating material, subsequently cooling or otherwise solidifying and then grinding the resulting slab.” Galler disclosed tallow to be a coating material (column 3, lines 24-35) and this teaching suggests that a coating can be made solely of a coating material. Therefore, the Examiner interprets Galler to disclose a coating that is only hydrogenated fat.

Applicant also states that Galler does not list hydrogenated tallow as one of the particularly good coatings. However, Applicant is once again referring to specific embodiments in support of this assertion. As Galler discloses that a coating of only hydrogenated tallow would be effective and thus, one of ordinary skill in the art would expect the same.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
